

## Alpha's in-house range

### Standard Colors

Thanks to Alpha, architects can now indulge in design and colour variations. The optical properties of the microprofiled sheet plate makes the doors perfectly suited to modern industrial architecture. Alpha's in-house range offers no fewer than 19 common colours to give each door its very own personality—at no extra cost. Thanks to this selection of colourfast coil coatings, the doors can always be seamlessly integrated into your company's look. Do you have special requirements when it comes to the colour?

Alpha can offer you a whole rainbow of colours.

**Dark colors** are to be avoided in alignment with the sun in double-walled steel doors, as a possible deflection can damage the door.

### STUCCO profiling

In addition to the 19 (ISO40) standard colours for microprofiling, 3 standard colours of ISO40 Stucco panels are available

## Types of windows

### The purpose of windows

ISO sectional doors can be fitted with Plexiglas windows for increased natural light and improved visibility. The standard windows are oblong, with straight or rounded corners containing single or insulating double glazing.

For additional security against intruders, narrow rectangular windows with rounded corners are also available. Are you looking for a one-of-a-kind design? Then go for the rounded windows or a creative pattern made up of windows.

 The light yield of the various windows
